

# Subject Index to Volume 1\*

## A

- abstracts, 1:13A; 2:150
- acrylic hydrogels, 4:281
- acute lymphocytic leukemia, 2:128-129
- adhesions, retinal, 1:6
- amblyopia, ocular toxocariasis and, 3:262
- amphotericin B
  - in *Aspergillus* endophthalmitis, 3:171, 173
  - in postoperative *C. parapsilosis* endophthalmitis, 3:182
- Amsler grid scoring
  - in angioid streaks complicated by choroidal neovascular membranes, 2:82
  - in retinoschisis, 4:053-054
- amyloidosis, diagnostic vitrectomy, 2:138-139
- angioid streaks, choroidal neovascular membranes in, argon laser photoocoagulation, 2:75-83
- aphakia, rhegmatogenous retinal detachment in, 3:186-189
- Arden grating contrast sensitivity, in retinoschisis, 4:294-295
- argon laser photoocoagulation
  - choroidal hemangioma, 1:58
  - choroidal neovascular membranes in angioid streaks, 2:75-83
  - in juvenile-onset diabetics with PDR, 1:20-25
  - macular yellow and, 4:306
  - in ocular histoplasmosis, 3:239-245
- Aspergillus* endophthalmitis, 3:171-174
- asteroid hyalosis
  - diagnostic vitrectomy, 2:141
  - pars plana vitrectomy, 3:253-256

## B

- BARN syndrome, *see* bilateral acute retinal necrosis
- Behcet's syndrome, levamisole in, 1:13A
- Benson's disease, *see* asteroid hyalosis
- bilateral acute retinal necrosis (BARN), 2:136-138
- birdshot retinochoroidopathy, 2:137-138
- Bloch-Sulzberger syndrome, *see* incontinentia pigmenti
- book reviews
  - Diabetic renal-retinal syndrome, E.A. Friedman and F.A. L'Esperance, Jr., 2:14A
  - Diabetic retinopathy: clinical evaluation and management, F.A. L'Esperance and W.A. James, Jr., 2:13A
  - Disorders of the peripheral fundus, William Tasman and Jerry A. Shields, 1:15A
  - Retinal detachment: diagnosis and management, William E. Benson, 2:13A
  - Textbook of fundus of the eye, Isaac C. Michaelson, 2:13A
  - Vitreous surgery, Ronald G. Michels, 1:15A
- breast cancer, metastatic to eye, 2:129-130
- butterfly dystrophy, 4:287-289

## C

- Candida papapsilosis* endophthalmitis, 3:179-185
- cardiovascular disease, and central retinal vein occlusion, 1:54
- carotenoids, 301-302
- cataract
  - complicating retinal detachment, 3:221-223
  - emulsification and removal, 1:4
- cataract extraction
  - extracapsular, choroidal ischemia and, 4:263-270
  - retinal detachment and, 3:233-238

\*Number preceding colon is the issue number, eg, abstracts are located on page 13A of issue No. 1 and on page 150 of issue No. 2.

- celloidin bag-cell block, diagnostic vitrectomy, 2:121
- central retinal vein occlusion (CRVO)
  - histopathologic study, 1:27-55
  - predisposing factors, 1:53
  - systemic disease and, 1:54
  - thrombus evolution, 1:53
  - types, 1:54
- choroidal hemangioma
  - bilateral, facial nevus flammeus and, 2:88-94
  - complications, 1:60
  - long-term visual prognosis, 1:56-61
- choroidal ischemia, cataract extraction by phacoemulsification and, 4:263-270
- choroidal melanoma, 2:100-105
- choroidal neovascular membrane, in angioid streaks, argon laser photoocoagulation, 2:75-83
- circumferential fold, scleral buckling for giant retinal tear and, 3:190-192
- collagen, type II, 2:96-99
- cryopexy, vitreoretinal pathology, 3:167-168
- cystoid retinal degeneration, choroidal hemangioma and, 1:60

## D

- diabetes mellitus
  - erythrocyte adhesion to endothelial cells, vascular complications and, 2:151
  - juvenile onset, *see* juvenile-onset diabetes mellitus
  - diabetic retinopathy
    - "abortive" foveal retinal neovascularization, 1:62-66
    - in Mauriac's syndrome, 2:84-87
    - proliferative, *see* proliferative diabetic retinopathy
  - macular yellow and, 4:303-304

## E

- electroretinography, in retinoschisis, 4:295
- ELISA testing, in ocular toxocariasis, 3:260-263
- emboli, in presumed transient cerebral or retinal ischemia, 1:13A
- emulsification, cataractous lens, 1:4
- endophlebitis, in central retinal vein occlusion, 1:50
- endophotoocoagulation, 2:117-120
  - subretinal neovascularization, 3:212-216
- endophthalmitis
  - Aspergillus*, 3:171-174
  - Candida parapsilosis*, 3:179-185
  - fungal, 2:134-136; 3:171-174, 179-185
  - metastatic, 3:175-178
  - nematode-induced, 2:131, 133
- endothelial cell proliferation, in central retinal vein occlusion, 1:27, 48
- entoptic phenomena, macular yellow and, 4:305-306
- epithelial ingrowth, diagnostic vitrectomy, 2:139-141
- erythrocyte, adhesion to endothelial cells in diabetes, 2:151

## F

- Farnsworth-Munsell 100-hue test, in retinoschisis, 4:294-295
- fluorescein angiography
  - in angioid streaks complicated by choroidal neovascular membranes, 2:78-80
  - in cataract extraction, 4:264, 265-268
- choroidal hemangioma, 1:57
- choroidal melanoma, 2:101-102
- macular yellow and, 4:306

- erythrocyte, adhesion to endothelial cells in diabetes, 2:151

## F

- Farnsworth-Munsell 100-hue test, in retinoschisis, 4:294-295
- fluorescein angiography
  - in angioid streaks complicated by choroidal neovascular membranes, 2:78-80
  - in cataract extraction, 4:264, 265-268
- choroidal hemangioma, 1:57
- choroidal melanoma, 2:101-102
- macular yellow and, 4:306

in relapsing polychondritis, 2:97  
 in retinoschisis, 4:295  
 siderosis bulbi, 3:204  
 subretinal neovascular membrane, 3:153-154  
 foreign body, intraocular, siderosis bulbi and, 3:201-207  
 foveal flicker fusion, in retinoschisis, 4:295  
 fungal endophthalmitis, 2:134-136; 3:171-174, 179-185

**G**

ghost cell glaucoma, 3:258  
 giant cell arteritis, prognosis, 1:13A  
 glaucoma  
 blood-induced, 3:257-259  
 and central retinal vein occlusion, 1:53  
 diagnostic vitrectomy, 2:122-125  
 gyrate atrophy, retina, 2:150

**H**

Haidinger's brushes, 4:305-306  
 Healon, in rolled-over retina, 3:228-232  
 hemangioma  
 choroidal, 2:88-94  
 circumscribed choroidal, 1:56-61  
 hemolytic glaucoma, 3:257-259  
 hemosiderotic glaucoma, 3:258  
 high altitude retinopathy, 1:13A  
 high myopia, retinal detachment in, photoagulation for, 3:162-165  
 histopathology  
 central retinal vein occlusion, 1:27-55  
 macular cysts/holes, 4:311-336  
*Histoplasma capsulatum*, 3:247  
 histoplasmosis, disseminated, 3:247  
 hypertension, and central retinal vein occlusion, 1:54  
 hyperornithinemia, retina, 2:150

**I**

immunology  
 relapsing polychondritis, 2:96-99  
 retinoblastoma, recurrent, 2:107-111  
 retinoblastoma associated with intracranial malignancy, 1:67-73  
 incontinentia pigmenti, proliferative retinopathy, 3:156-161  
 inflammation, diagnostic vitrectomy, 2:130-137  
 inflammatory cell infiltration, in central retinal vein occlusion, 1:50  
 intracranial malignancy, and bilateral retinoblastoma, 1:67-73  
 intraocular lens (IOL)  
 implantation, transcameral IOL stay suture, 3:197-200  
 metal-loop, vitreoretinal complications, 3:193-196  
 intravitreous gas, in retinal detachment surgery, 3:197  
 intravitreous therapy  
*Aspergillus* endophthalmitis, 3:171  
 postoperative *C. parapsilosis* endophthalmitis, 3:179-185  
 ischemic oculopathy, carotid artery disease and, 2:151

**J**

juvenile-onset (type 1) diabetes mellitus, 2:150  
 proliferative diabetic retinopathy in, 1:18-26  
 juvenile xanthogranuloma of iris, 2:128-129

**L**

lamellar macular holes  
 nontrauma-associated, 4:324-328, 332  
 trauma-associated, 4:321-323, 332  
 Leber's military aneurysm, 3:167-168  
 leukemia, acute lymphocytic, 2:128-129  
 levamisole, in Behcet's syndrome, 1:13A  
 Log Mar near vision reading cards, in retinoschisis, 4:294-295

**M**

macular choroidal neovascularization, ocular histoplasmosis and, 3:239  
 macular cysts  
 nontrauma-associated, 4:330-331, 333  
 trauma-associated, 4:328-330, 333  
 macular fibroplasia, 3:214  
 macular function, in retinoschisis, 4:293-295  
 macular holes  
 full-thickness, 4:331-332  
 nontrauma-associated, 4:317-321, 332  
 retinal detachment, 3:162  
 trauma-associated, 4:311-317, 331-332  
 macular pucker, postoperative, 2:113-116  
 macular yellow, 4:296-308  
 diet and, 4:303-304  
 entoptic phenomena and, 4:305-306  
 fluorescein angiography and, 4:306  
 functions, 4:304-305  
 photocoagulation and, 4:306  
 malignancy, multiple, choroidal melanoma and, 2:100-105  
 malignant melanoma  
 iris, 2:129-130  
 metastatic to iris, 2:129  
 massive periretinal proliferation  
 arrest of, 3:208-211  
 diagnostic vitrectomy, 2:143  
 Mauriac's syndrome, diabetic retinopathy in, 2:84-87  
 melanoma  
 choroidal, 2:100-105  
 malignant, see malignant melanoma  
 membrane peeling, 3:212  
 metastasis, retinoblastoma, 2:107-111  
 metastatic endophthalmitis, 3:175-178  
 Millipore filter, diagnostic vitrectomy, 2:121

**N**

Nagel anomalscope test, in retinoschisis, 4:294-295  
 neovascularization  
 "abortive" foveal, 1:62-66  
 in central retinal vein occlusion, 1:51  
 nevus flammeus, bilateral choroidal hemangiomas in, 2:88-94

**O**

Octopus perimetry, in retinoschisis, 4:294-295  
 ocular histoplasmosis, 3:239-245  
 ocular toxocariasis, pars plana vitrectomy, 3:260-263  
 ocular tumors, diagnostic vitrectomy, 2:125-130

**P**

pars plana vitrectomy, 2:118-120  
 asteroid hyalosis, 3:253-256  
 circumferential fold, 3:190-192  
 ocular toxocariasis, 3:260-263  
 postoperative *C. parapsilosis* endophthalmitis, 3:179-185  
 pars planitis, diagnostic vitrectomy, 2:131-133  
 pattern dystrophies, 4:287-289  
 persistent hyperplastic primary vitreous (PHPV), 2:137-139  
 phacoanaphylaxis, diagnostic vitrectomy, 2:130  
 phacoemulsification, choroidal ischemia and, 4:044-051  
 phlebitis, in central retinal vein occlusion, 1:50  
 photoagulation  
 in choroidal hemangioma, 1:61  
 as sole treatment for early posterior retinal detachment, 3:162-165  
 see also argon laser photoagulation; xenon arc photoagulation  
 pinealoblastoma, and bilateral retinoblastoma, 1:67  
 preretinal vascular loop, 4:290-291  
 proliferative diabetic retinopathy (PDR), 1:1-17  
 diagnostic vitrectomy, 2:142

- extraretinal features, 1:5
- in juvenile-onset diabetics, 1:18-26
- pathogenesis, 1:1-2
- surgical objectives, 1:3-11
- surgical technique, 1:3-17
- vitrectomy for, 1:3-17
- complications, 1:14
- indications, 1:11
- technique, 1:3-11
- proliferative retinopathy, incontinentia pigmenti and, 3:156-161
- pseudoxanthoma elasticum, and angioid streaks, 2:76-80

## R

- recanalization, 1:29, 32-48
- Refojo implant, 4:281-286
- relapsing polychondritis, ocular manifestations, 2:96-99
- reticulum cell sarcoma, ocular, 3:247-248
- diagnostic vitrectomy, 2:125-128
- retina
  - BARN syndrome, 2:136-138
  - calcific embolism, cervical internal carotid artery aneurysm and, 1:13A
  - hyperornithinemia and gyrate atrophy, 2:150
  - rolled-over, 3:228-232
  - retinal branch vein occlusion, rhegmatogenous retinal detachment and, 3:186-189
  - retinal breaks, 1:9-11, 12; 3:186
  - endophotocoagulation for, 2:117-120
  - Refojo implant, 4:281-286
  - retinal detachment
    - advanced fibrovascular proliferation, 1:8
    - cataract complicating scleral buckling for, 3:221-223
    - circumferential fold and, 3:190-192
    - diabetic traction, 1:7
    - early posterior, photocoagulation for, 3:162-165
    - extracapsular cataract extraction and, 3:223-233
    - metal loop intraocular lens and, 3:193-196
    - nonrhegmatogenous, choroidal hemangioma and, 1:60
    - postoperative, 1:15
    - retinitis pigmentosa and, 3:224-227
    - scleral buckling for, 2:113-116
    - surgery 3:197
      - massive periretinal proliferation in, 3:208-211
      - tractional, diagnostic vitrectomy, 2:142
    - retinal edema, in central retinal vein occlusion, 1:51
    - retinal pigment epithelium
      - pattern dystrophy, 4:287-289
      - subretinal neovascularization, 3:151-155
    - retinal reattachment, spontaneous, 3:217-220
    - retinal tear(s)
      - giant, Healon in, 3:228
      - scleral buckling for, circumferential fold following, 3:190-192
      - postoperative, 1:14
    - retinitis pigmentosa, retinal detachment and, 3:224-227
    - retinoblastoma
      - bilateral, intracranial malignancy in, 1:67-73
      - immunodiagnosis, 2:107-111
        - metastatic, 2:107-111
    - retinopathy
      - diabetic, *see* diabetic retinopathy
      - high altitude, 1:13A
      - proliferative, *see* proliferative retinopathy
    - retinoschisis, macular function in, 4:293-295
    - rhegmatogenous retinal detachment
      - and metastatic endophthalmitis, 3:175-178
      - retinal vein occlusion and, 3:186-189
      - spontaneous reattachment, 3:217-220
      - subretinal fluid drainage, 4:271-280
    - rubesis iridis, 1:12

## S

- salt-and-pepper fundus, 4:287-289

## scleral buckling

- for giant retinal tear, circumferential fold following, 3:190-192
- hydrophilic acrylate implant for, 4:281-286
- retinal detachment, 3:221-223
  - for rhegmatogenous retinal detachment, 2:113-116
- siderosis bulbi, intraocular stone and, 3:201-207
- steroids, in massive periretinal proliferation, 3:208-211
- Sturge-Weber syndrome, 2:88
- subretinal fluid, drainage, 4:271-280
- subretinal neovascular membrane, 3:151-155
  - endophotocoagulation and, 3:212-216
- suture, transcameral, 3:197-200

## T

- thrombus
  - in central retinal vein occlusion, 1:28-32
    - evolution, 1:53
  - healing process of, 1:52
  - recanalized, in CRVO, 1:32-48
- Toxocara, 3:261
- trans pars plana vitrectomy, in blood-induced glaucoma, 3:257-259
- transcameral suture, 3:197-200
- trauma
  - macular cysts/holes and, 4:311-336
  - retinal detachment and, 3:224
- type II collagen, 2:96-99

## U

- ultrasonography
  - choroidal hemangioma, 1:58
    - bilateral, 2:92-93
  - in relapsing polychondritis, 2:98
- uveitis, unknown cause, vitreous biopsy in, 3:246-252

## V

- venous stasis retinopathy, 1:54
- visual acuity
  - in angioid streaks complicated by choroidal neovascular membranes, 2:81
  - in choroidal hemangioma, 1:57, 59-61
  - in proliferative diabetic retinopathy, argon laser photocoagulation, 1:21
- vitrectomy
  - in *Aspergillus* endophthalmitis, 3:171
  - diagnostic, 2:121-149
  - pars plana, *see* pars plana vitrectomy
    - for proliferative diabetic retinopathy 1:3-17
      - complications, 1:14
      - indications, 1:11
      - technique, 1:3-11
    - vitreous hemorrhage, 3:193
  - vitreoretinal disease, posterior pole photocoagulation, 3:166-170
  - vitreous biopsy, in uveitis of unknown cause, 3:246-252
  - vitreous hemorrhage
    - glaucoma and, 3:257-259
    - metal-loop intraocular lenses and, 3:193-196
  - vitreous surgery, *see* vitrectomy

## X

- xanthogranuloma, juvenile, of iris, 2:128-129
- xanthophyll
  - absorption spectra, 4:299
  - nature, 4:301-303
- xenon arc photocoagulation
  - choroidal hemangioma, 1:58; 2:89
  - endophotocoagulation, 2:117-120
  - posterior pole, effect on peripheral vitreoretinal pathology, 3:166-170

# Author Index to Volume 1
